

Aniq Basim Bin Ramza

Software Engineering Undergraduate | Web & Mobile Developer | Data, Cloud & AI Enthusiast

aniqbasim11245@gmail.com | [+60199906356](tel:+60199906356) | Kuala Lumpur, Malaysia | [Portfolio](#) | [GitHub](#)

PROFILE

Software Engineering undergraduate with practical experience in web and mobile application development, database design, cloud monitoring, data visualization and AI-driven solutions. Developed IRHS, a web-based student return-to-home application system using PHP, CodeIgniter 4 and MySQL, and MYCAT, a Flutter mobile application with Firebase authentication, rule-based assistance and CNN-based image recognition. Strong interest in building reliable, scalable and user-focused systems while continuously expanding technical capabilities.

TECHNICAL SKILLS

Programming Languages	Java, C++, Python, PHP, HTML/CSS, JavaScript, Dart
Frameworks & Technologies	Flutter, Laravel, CodeIgniter 4, Tailwind CSS
Databases	MySQL, Firebase
Data & Analytics	Orange Data Mining, Microsoft Power BI
Operating Systems & Tools	Ubuntu Linux, Grafana, Prometheus, Visual Studio Code, Android Studio, Git, GitHub
Languages	Bahasa Melayu, English

TECHNICAL COMPETENCIES

- Designed and managed databases using MySQL and Firebase for academic and final-year projects.
- Built interactive dashboards and performed data visualization using Microsoft Power BI.
- Implemented system monitoring and metrics visualization using Grafana and Prometheus for cloud computing coursework.
- Performed basic Ubuntu server setup and configuration, including environment preparation and system updates.
- Diagnosed and resolved hardware, software and basic network issues through structured troubleshooting.

EDUCATION

Universiti Sultan Zainal Abidin | Oct 2023 - Present

Bachelor of Computer Science (Software Development) with Honours

- CGPA: 3.57
- Dean's List Award recipient for 3 semesters

Politeknik Sultan Mizan Zainal Abidin | Aug 2020 - Jun 2023

Diploma in Information Technology (Digital Technology)

- CGPA: 3.78
- Dean's List Award recipient for 5 semesters

WORK EXPERIENCE

Intern | JTR Computer and Electronics Sdn. Bhd. | Jan 2023 - Jun 2023

- Diagnosed and resolved hardware and software issues for computers, laptops and electronic devices.
- Provided technical support for Windows and Linux operating systems, including software installation and troubleshooting.
- Performed maintenance tasks such as hardware inspection, component replacement and system optimization.
- Assisted with device setup and configuration, including drivers, applications and system updates.
- Resolved basic network connectivity issues, including TCP/IP configuration and device setup.
- Supported customers and internal staff by identifying issues and delivering practical technical solutions.
- Managed multiple technical tasks efficiently while meeting operational deadlines.

PROJECTS

IRHS: Return to Home System | Web-Based Application | Jun 2022 - Dec 2022

Technology stack: PHP, CodeIgniter 4, MySQL, Telegram API, Email Notification

- Developed a web-based system to digitize and replace the manual paper-based return-to-home application process for students.
- Designed and implemented key modules for application submission, approval workflow and real-time status tracking.
- Structured and managed the database schema to handle student records and application data efficiently.
- Collaborated with team members to gather requirements, design the system flow and perform testing to improve reliability.
- Integrated Telegram and email notifications to automatically update users on application status.

MYCAT: AI-Powered Smart Tracker Application | Mobile Application | Jan 2026 - Jun 2026

Technology stack: Flutter, Dart, Firebase Authentication, Rule-Based Chatbot, CNN, Google Teachable Machine

- Developed a Flutter mobile application for recording, monitoring and managing cat-related information.
- Designed user-friendly interfaces to support efficient pet data entry, tracking and management.
- Implemented Firebase email-based registration and login authentication.
- Built a rule-based chatbot to provide basic user assistance and interaction within the application.
- Integrated cat image recognition using a CNN model trained with Google Teachable Machine.

CERTIFICATIONS

- Gold Medal, Virtual Innovation Competition (2022)
- Robot Operation and Simulation Program with IIoT Integration, MIT Academy (2026)

COMMUNITY & LEADERSHIP

Community Project: SULAM Project | 2025

- Collaborated with a team to help a local coffee business improve sales performance and brand recognition.
- Conducted basic market research and identified strategies to attract customers and increase visibility.
- Led promotional ideation, including social media content and marketing approaches.
